

ORGANISATIONS ARE MORE EFFECTIVE IN MOBILISING EVIDENCE AND INTERNALLY GENERATED KNOWLEDGE

The Health Education England (HEE) Knowledge Management (KM) Team have:

- Delivered ongoing support for the HEE Technology Review via weekly bulletins to keep the team up to date with emerging evidence, summarising some key papers, and managing the knowledge repository to gather evidence throughout the review - (<http://www.hee.nhs.uk/our-work/topol-review>)
- Presented the KM programme plan to the Information Strategy Steering Group and Information Leads, to ensure support from this important group of stakeholders
- Raised awareness of the evidence base for the new HEE Workforce Transformation leads group, with a weekly search and summary of the latest intelligence, looking 'upward and outward' and mapped to the HEE Star - (<http://www.hee.nhs.uk/our-work/hee-star>)

"We are required to be system leaders and a 'go to' body, to advise and steer provider system investment and actions – it is very difficult to do this credibly, without some degree of evidence/ information to underpin"

Head of Workforce Transformation about the work of the HEE KM Team

Knowledge Management Advent

2,826k views for the 15 tools and techniques shared

Top door = Randomized Coffee Trials (534 views)

6k views on the Clinical Librarians blog in December 2017. The most views ever
Fantastic Twitter engagement including sharing examples of KM in action

Knowledge Management Advent

Katie Nicholas and Emily Hopkins –
The Knowledge Management team

Confed18 - LKS staff promoted a range of tools and techniques to help organisations mobilise knowledge including KM postcards, e-learning modules, and the Evidence and Knowledge self-assessment tool
<https://bit.ly/2KxG1ci>

Talking to organisations that don't have LKS - so far conversations have taken place with AQUA and a number of northern AHSNs

After a North East workshop LKS staff joined the new Strategic Transformation Evidence Mobilisation Group (STEM) to enable evidence-based practice across the STP. Following meetings with public health and commissioning staff, NHS LKS now support a number of STP work streams.

STEM Vision

"At every decision-making table, there will be someone with the skills, experience and knowledge to ensure that decisions are informed by relevant evidence."

The KM Programme Manager (HEE) ran a Knowledge Café for around 30 attendees at the Health Libraries Group Conference.

This posed the question of how to develop an agile future workforce, and raised awareness of this knowledge sharing format

Future Plans

Knowvember
KM event in Leeds
<https://bit.ly/2IVXvJL>

60+ individuals across HEE have signed up to participate in Randomized Coffee Trials
<https://bit.ly/2tXVIIl>

Following up with 70+ senior staff who made contact at Confed18
