### **Jon Brassey & Trip (presentation uploaded to web site)**

Trip started in 1997. Jon originally from the Wirral. The aim of the website originally was to help G.P. become more clinically effective. If we can't answer a clinical question on Trip we ask ourselves why not? The site is a connection with clinical reality. Hierarchy of evidence in Trip. Every month Jon Brassey manually inputs data into Trip, he is hands-on. Clinician's say that 70% of searches on Trip actually help. There are nearly 50,000 registered users. Questions and answers section is very popular. Now an option to use a PICO search format, a good way to promote the use, handy to use in training. Images are available via TRIP. Colour indicators – Green indicates high quality evidence. Filters – Synonyms. A useful Timeline for searching could help with re-validation. **The Future** RCT now available via Trip. Integration of Dynamed. Case Reports.
