

# Developing a Knowledge Hub

## BACKGROUND

A joint initiative with the Trust's **Learning Technologies Team** with input from staff in corporate departments and clinicians.

Provides a single virtual space where information can be held for the development of staff and the improvement of services (QI)

Hosted on the Trust's learning platform – **Learning Hub** – it provides a well-known, well-used and secure portal which can be accessed by staff within and without the Trust.

## FEEDBACK

Launched in Summer 2018, staff were surveyed and **94%** thought **Development Zone** was a good idea, specific reasons being :

- I think it would be great for staff to have a **designated area** for their development. It is so important that we all continue to learn and develop within our roles and as people. No-one knows it all!
- It's the **first port of call** for people seeking to engage in life-long learning and continuous professional development.
- It is good to be able to access the information you need to develop yourself and your service in **one easy to use place!**
- It's very important that staff know their employer is willing to invest in them. The Development Zone supports this aim.
- Everything you need is **together and easy to access**

## NEXT ON THE AGENDA...

A repository of QI projects  
A student portal
