

TRAINING & DEVELOPMENT PROGRAMME

2018 - 2019

Over 800 library and knowledge service (LKS) staff attended events

More than 45 HCLU provided development events

All events based on development needs analysis to deliver the **Knowledge for Healthcare** vision

"After participating in the HEE/CILIP Leadership programme I feel much more confident in applying leadership skills both within my organisation and in the wider LKS Management Network. I attended the Christmas Study Day for the first time this year and came away brimming with ideas such as setting up a Reading Group and putting my organisation in contact with Liverpool Medical Institute after hearing about their project with Chester."

HCLU, LKS and Manchester Metropolitan University Staff have worked together to develop a Health Librarianship module for delivery in September 2019 as part of the MA in Library and Information Management

Collaborating with the national CPD group to deliver regionally based training on Grey Literature and Systematic Reviews

HCLU funded the network staff libraries to purchase a regional collection of e-books that are relevant to LKS staff

HCLU staff worked with regional LKS networks to deliver study days celebrating good practice across the regions

"As a result of attending workshops on Critical Appraisal and Systematic Review, led by Michelle Maden, I have started teaching post graduate students critical appraisal skills within our institution, with excellent feedback so far. I have been able to far more adequately support our researchers who are undertaking SRs."

"Since attending the Library Assistant study day, I have done a walk-through of the library noting first impressions, I no longer use words like 'unfortunately' and I have suggested a subject guide."

"As a member of staff new to NHS libraries these training events were invaluable in building my knowledge of health libraries and related issues and developing professional skills"

"Attending 'getting the most out of conferences' enabled me to secure a bursary from CILIP NW to attend the CILIP conference in Brighton. Also, it helped me put together an abstract for 'It's Great Up North' "

" Health Literacy - using this to encourage development of more readable documents within my organisation and to support my volunteer manager role at local public library, including liaison with the council's public health services."

Forthcoming Events for April 2019 - March 2020

- It's Great Up North 2019
- LKS Library Managers Meetings
- Writing for Publication - Train the Trainer
- Health Literacy Training
