

The HIS Bulletin

(Health Informatics Service)

What?

- A monthly digest bulletin, synthesising top news, reports, guidelines etc.
- Produced by the Library and Knowledge Service for Health Informatics Service Staff.

KNOWLEDGE SUMMARY

Informatics

December 2019

To keep up to date with the latest reports, guidelines and news, see the Library and Knowledge Service's Knowledge Pages at: <http://www.knowledge-nw.nhs.uk/knowledge/Pages/RSSPage.aspx>

NICE National Institute for Health and Care Excellence

East of England Stroke Telemedicine Stakeholder Partnership

<https://www.nice.org.uk/sharedlearning/east-of-england-stroke-telemedicine-stakeholder-partnership>

The East of England Stroke Telemedicine Stakeholder Partnership provides rapid access to Out of Hours (OOH) stroke expertise for seven of the region's hospitals. Using secure videoconferencing telemedicine technology facilitates the rapid, direct access to stroke expertise, allowing for a greater access to thrombolysis.

Care Recoded: General Practice in the Digital Age

<https://www.livi.co.uk/reports/carecoded/>

The NHS is accelerating towards a digital future, with all patients in England to have access to video consultations by April 2021. GPs and patients are ready to embrace this change, reimagining how we think about healthcare. This report examines some of the challenges and solutions needed to accelerate this digital transformation.

Artificial Intelligence: How to get it right. Putting policy into practice for safe data-driven innovation in health and care

https://www.nhs.uk/assets/NHSX/Al_report.pdf

This report gives a considered and cohesive overview of the current state of play of data-driven technologies within the health and care system, covering everything from the local research environment to international frameworks in development. Informed by research conducted by **NHSX** and other partners over the past year, it outlines where in the system AI technologies can be utilised and the policy work that is, and will need to be done, to ensure this utilisation is done in a safe, effective and ethically acceptable manner.

Special Report: Interoperability

<https://www.digitalhealth.net/2019/11/special-report-interoperability-4/>

Interoperability is an issue which is high on the agenda for many NHS IT leaders and increasingly, standards such as fast healthcare interoperability resources (FHIR) and SNOMED-CT are being used by suppliers for the purpose of interoperability. Jennifer True and investigates whether FHIR and similar standards have finally become fully embedded in

Why?

- LKS usage statistics identified non-clinical staff as 'low users' of the service.

More why?

- We also wanted to make more use and raise awareness of our current awareness service 'Knowledge Pages'

How?

- Meeting with Health Informatics Service Director and Chairman

At the Meeting...

- **Lack of understanding by HIS staff about what services the LKS provides.**
- **A need for HIS staff to keep up to date with developments in informatics**
